JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Adsorption
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon 180
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm 195
Alkali cations
Molecular dynamics study of alkali cations at the water/liquid mercury interface 73
Annealing
Electrochromism of annealed vacuum-evaporated V_2O_5 films 175
Atomic free microscopy
Identification of different silver nucleation processes on vitreous carbon surfaces from an ammonia electrolytic bath 81
Autoxidation
Mechanistic study of the autoxidation of reduced flavin and quinone compounds 236
Battery
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications 103
Capacitance
Electrochemial and mass measurements during small voltage amplitude perturbations of conducting polyaniline films 63
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films 49
Cast films
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes 266
Catalysis
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions 168
Catalytic mechanism
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism 163
Chronoamperometry
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism 163
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number 1
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms 41
Identification of different silver nucleation processes on vitreous carbon surfaces from an ammonia electrolytic bath 81
Clay-modified electrode
Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes 253
Cobalt deposition
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon 125
Cobalt electrocrystallization
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon 125
Conducting polymers
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications 103
Conductor + insulator composite electrodes
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms 41
Constant phase element
On the electrical capacitance of interfaces exhibiting constant phase element behaviour 149
Convolution
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms 41
Copper(II) salen
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide 95
Cyclic voltammetry
Cyclic voltammetry at constant sphericity 243
Diffusion coefficient
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number 1
Digital simulation
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions 262
Double layer
On the electrical capacitance of interfaces exhibiting constant phase element behaviour 149
Electrical capacitance of interface
On the electrical capacitance of interfaces exhibiting constant phase element behaviour 149
Electrochemical
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films 49
Electrochemically modulated liquid chromatography
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon 180
Electrochemical polymerization
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications 103
Electrochemical quartz crystal microbalance
Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes 253
Electrochemical reduction
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide 95
Electrochromism
Electrochromism of annealed vacuum-evaporated V_2O_5 films 175

PII S0022-0728(98)00055-2

Electrodeposition
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide 208
Identification of different silver nucleation processes on vitreous carbon surfaces from an ammonia electrolytic bath 81
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions 168
Electrode reaction
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm 195
Electro-dimerization mechanism
Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions 227
Electrolyte/analyte ratio
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios 137
Electrosorption
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm 195
Flavin
Mechanistic study of the autoxidation of reduced flavin and quinone compounds 236
Flow-through external pressure-balanced reference electrode (FTEP-BRE)
Advanced flow-through external pressure-balanced reference electrode for potentiometric and pH studies in high temperature aqueous solutions 186
Functionalized monomer
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties 217
Glassy carbon cathodes
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide 95
Glassy carbon electrode
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide 208
Influence of the coordination sphere on the mechanism of cobalt nucleation onto glassy carbon 125
Glucose oxidase
Mechanistic study of the autoxidation of reduced flavin and quinone compounds 236
Hammett
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications 103
Heterogeneous kinetic parameters
Cyclic voltammetry at constant sphericity 243
Hydrous oxide
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide 208
Hysteresis behavior
Electrochemial and mass measurements during small voltage amplitude perturbations of conducting polyaniline films 63
Ideally polarizable electrode
On the electrical capacitance of interfaces exhibiting constant phase element behaviour 149
Impedance
Electrochemial and mass measurements during small voltage amplitude perturbations of conducting polyaniline films 63
Impedance spectroscopy
On the electrical capacitance of interfaces exhibiting constant phase element behaviour 149
Impedance voltammetry
Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions 227
Interfacial structure
Molecular dynamics study of alkali cations at the water/liquid mercury interface 73
Ion compensation
Electrochemial and mass measurements during small voltage amplitude perturbations of conducting polyaniline films 63
Ion-exchange
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties 217
Ionic conductivity
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions 117
Iridium oxide
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide 208
Irreversible reactions
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions 262
Langmuir–Blodgett films
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes 266
Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies 5
Linear sweep voltammetry
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm 195
Liquid chromatography
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon 180
Liquid mercury
Molecular dynamics study of alkali cations at the water/liquid mercury interface 73
Low temperature
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions 117
Mass transport processes
Clay-modified electrodes as studied by the quartz crystal microbalance: redox processes of ruthenium and iron complexes 253
Mercury electrode
Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions 227
Methyl viologen di-cation
Impedance voltammetry of electro-dimerization mechanisms: application to the reduction of the methyl viologen di-cation at mercury electrodes and aqueous solutions 227
Microelectrode
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number 1
Modified electrodes
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions 168
Molecular dynamics
Molecular dynamics study of alkali cations at the water/liquid mercury interface 73

Molybdenum
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions 168
Monosubstituted benzenes
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon 180
Morphology
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications 103
Multipotential step
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism 163
Natural convection
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms 41
Normal pulse polarography
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm 195
Ohmic drop
Determination of the electroactive area of graphite + polyethylene composite electrodes. Uncompensated resistance effects and convolution analysis of chronoamperograms 41
Oxidation
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios 137
Oxometalates
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions 168
pH electrode
Electrochemical deposition of iridium(IV) oxide from alkaline solutions of iridium(III) oxide 208
Platinum electrode
Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) 273
Platinum oxide
Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) 273
Polarography
Electrochemical reactions with adsorption of the reactants and electrosorption. Simple analytical solutions for a Henry isotherm 195
Polyaniline
Electrochemial and mass measurements during small voltage amplitude perturbations of conducting polyaniline films 63
Polyesters
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes 266
Poly(3,4-ethylenedioxythiophene)
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties 217
Polythiophene
The electrochemistry of fluorine-substituted polyphenylthiophenes for charge storage applications 103
Porosity
The influence of porosity and the nature of the charge storage capacitance on the impedance behaviour of electropolymerized polyaniline films 49
Porous graphitic carbon
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon 180
Potentiometric and pH measurements in high-temperature high-pressure aqueous solutions
Advanced flow-through external pressure-balanced reference electrode for potentiometric and pH studies in high temperature aqueous solutions 186
Quartz crystal microbalance
Electrochemial and mass measurements during small voltage amplitude perturbations of conducting polyaniline films 63
Quinone
Mechanistic study of the autoxidation of reduced flavin and quinone compounds 236
Redox couples
Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples 33
Reduction
About potential measurements in steady state voltammetry at low electrolyte/analyte concentration ratios 137
Relative stabilities of copper(II) complexes
Electrochemical reduction of copper(II) salen at carbon cathodes in dimethylformamide 95
Scanning electrochemical microscope
Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) 273
SECM
Scanning electrochemical microscopy (SECM): study of the formation and reduction of oxides on platinum electrode surfaces in Na_2SO_4 solution (pH = 7) 273
Semiconductor
Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples 33
Semiquinone radical
Mechanistic study of the autoxidation of reduced flavin and quinone compounds 236
SiO_2 gels
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions 117
Solid electrodes
On the electrical capacitance of interfaces exhibiting constant phase element behaviour 149
Solvent exchange
Low-temperature ionic conductivity of relevant solutions and of SiO_2 gels before and after exchanges in propylene carbonate solutions 117
Solvent trapping
Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies 5
Spherical electrode
Cyclic voltammetry at constant sphericity 243
Square wave voltammetry
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions 262
Staircase voltammetry
Contribution to the study of square wave voltammetry in the case of simple irreversible reactions 262
Stationary phases
Electrochemically modulated liquid chromatography (EMLC) as a probe of the adsorption characteristics of monosubstituted benzenes at porous graphitic carbon 180
Superlattice electrodes
Electrochemistry of GaAs/AlGaAs superlattice electrodes in acetonitrile solutions with metallocene redox couples 33

Surface-enhanced Raman scattering
Solvent trapping during the self-assembly of octadecanethiol monolayer on roughened gold electrodes from surface-enhanced Raman scattering studies 5
Transference number
A novel electrochemical method for simultaneously measuring diffusion coefficient and ion transference number 1
Tungsten
New electroactive metal oxides electrodeposited from selected Keggin and Dawson-type heteropolyanions 168
Vacuum-evaporated films
Electrochromism of annealed vacuum-evaporated V_2O_5 films 175
V_2O_5
Electrochromism of annealed vacuum-evaporated V_2O_5 films 175
Voltammetric response
Electrochemical properties of Langmuir–Blodgett films of polyesters derived from oligothiophenes 266
Voltammetry
Analytical solution corresponding to the i/t response to a multipotential step for a catalytic mechanism 163
Water-soluble oligomer
Electrochemical behaviour of 3,4-ethylenedioxythiophene functionalized by a sulphonate group. Application to the preparation of poly(3,4-ethylenedioxythiophene) having permanent cation-exchange properties 217
